Position Description (Duty Description):

The ANG requires virtual and external Safety Evaluation Program support at multiple ANG installations to integrate with the gaining MAJCOM IG Capstone event IAW 21-202 and 90-201, as part of the Air Force Inspection System. Individual will execute appropriate actions of the planning-level tasks below in coordination with the assigned Gate Keeper and the ANG in order to ensure the Installation is compliant with current Federal, State and Local Instructions, Regulations and Standards. Individual will be responsible for all assigned matters pertaining to the day-to-day operation and management of the ANG's Weapon's Safety’s Program Evaluations. Virtual Inspections of Installation Weapons Safety Programs consist of a virtual document review of Weapons Wing Safety SharePoint, MICT and IGEMS. Individual will perform annual virtual document reviews of all 90 Air National Guard installation’s Wing Safety SharePoint, Weapons Safety Management Internal Control ToolseT, and any available audits from the Installation’s Unit Effectiveness Inspections as a means of assuring ANG compliance and conformity with all applicable federal, state and local laws, regulations, Department of Defense, Air Force and ANG instructions and policies and Presidential Executive Orders. Virtual inspections are the continual evaluation portion of the UEI process conducted through the gathering and analysis of metrics, reports and other data without on-site inspection. The virtual report will identify conformance/non-conformance within ANG Weapons safety and non-compliance of Safety laws and regulations. Individual will perform Safety Program Evaluations based on Safety Communicators and Virtual audits provided by NGB/SEW. Individuals work will consist of collecting, reviewing, and evaluating the wing mishap prevention program. Additionally, the individual will provide a report to the Division Chief, summarizing the Safety Program Evaluation reviews and findings during the assessment. Individual will track all deficiencies and findings until closure. Individual will facilitate open communications between all Wing safety staffs. Individual will take care of many matters, to include answering substantive questions requiring technical safety knowledge, such as status of reports, suspense dates for matters requiring compliance, and similar information readily available from the files.
