Position Description (Duty Description):

Manages the programmatic, capability requirements definition, acquisition, financial aspects, technical evolution, fielding, sustainment and focus on the operational needs of the ANG's intelligence and cyber modernization programs. Responsible for managing the annual allocation of National Guard and Reserve Equipment Account (NGREA) resources along with budgeted Air Force funding to meet critical capability/equipment shortfalls identified by warfighters at the annual Weapons and Tactics Conference (WEPTAC), and by emergency managers at the Domestic Capability Priorities (DCP) conference. Develops acquisition, fielding, and sustainment plans in concert with System Program Offices (SPOs), and represents NGB/A5 at HQ USAF, MAJCOMs, and field units to integrate, document, validate, fund, procure, and deliver equipment to and get modification approvals ANG Major Weapons Systems (MWSs). This position requires well-honed written and verbal communication skills. Knowledge of the Joint Capabilities Integration and Development System (JCIDS), Defense Acquisition System (DAS), Planning, Programming, Budgeting and Execution (PPBE) process, and familiarity with the staffing processes at the National Guard Bureau, HQ USAF, MAJCOMs, State/unit levels are a plus. Previous air operations experience is highly desired.

The individual will assist the Director by overseeing all facets of program development leading to procurement and modernization of the equipment and software required to keep the MWSs on par with the Air Force and other Joint Services. Works with the Air National Guard and Air Force Reserve Command Test Center (AATC) to support test efforts determine the best strategy to improve capabilities in testing unique aspects of the Guard's missions. Coordinates with multiple national agencies at the National Guard Bureau to determine accountability and authorization. Develops acquisition plans to include producing contract packages. The individual will track deliveries, verify financial transactions and ensures the ANG receives highly effective equipment and modifications.

The individual will use their operational background to analyze capability gaps in the ANG forces and craft the system management plans to optimize the investments in the ANG modernization programs. The individual needs to demonstrate and apply matured military judgment across all facets of projecting air power overseas and domestically. Forward thinking, comprehensive understanding of operations, understanding of the relationship between the ANG and the active duty Air Force, and understanding of the functions of the NGB are all attributes a candidate should possess.
