Position Description (Duty Description):

Selectee will serve as the lead for the Western Air Defense Sector's effort to explore the use of DevSecOps software development to further the mission of US Battle Control Centers. The member is expected to undergo training and qualification with an established USAF software factory to become proficient with the tools, practices, and processes used in mature DevSecOps units. Once qualified, the member will lead the effort to build, advocate for, and potentially implement a proposal to establish one or more new software factories serving US Battle Control Centers.
